1300 Men Employed in Old Dominion.

The Old Dominion Copper Mining & Smelting company is maintaining its usual record of industry. Under the supervision of Acting Supt. Geo. Kingdon, a force of between 700 and 800 men are employed underground and about 500 men are working elsewhere about the mine and smelter. About nine-tenths of the ore now being treated by the Old Dominion smelter is coming from the company's mine from the levels between the second and the sixteenth. Most of it, however, is being taken from the workings below the ninth level, as the lower levels are proving much more productive than the higher ones.

The smelter is not now receiving any great amount of custom ore, but with the gradual advent of the various Globe district mines into the list of producers, the shipments of ore will, of course, materially increase and consequently the output of the Old Dominion mine, for many years the mainstay financially of Globe enterprises, will increase accordingly. The present output is about 90,000 pounds of copper a day. In the power plant of the Old Dominion, the installation of a large number of economizers has resulted in a considerable saving of expense.—Globe Silver Belt.

Improvements on Little Daisy Mine.

Advices from Jerome are to the effect that the Little Daisy mine is undergoing a mechanical regeneration and during the present week the new and extensive equipment ordered some time ago for the property will be in place and under operation.

The plant consists of two hoists, one for the surface and the other at the 800-foot level, where a winze is being sunk. A new compressor, air drills, motors and other appliances make up the system that has been ordered, and which the splendid showing warrants. Connection is being made with the line of the Arizona Power company and the current is expected to be turned on when the machinery is ready.

The introduction of the new machinery will facilitate the operation of the enterprise on lines of practical and economical consideration and when the plant is ready the resumption of work will follow by placing a number of miners at work and who, pending the installing of the same, were laid off.

It is now the purpose of the management to prosecute development steadily and to follow out the plan as originally decided upon, the underground conditions supporting the heavy expense that has been given in this new equipment.—Journal-Miner.

Important Strike in Deadwood Mine.

Recent advices to the Silver City, N. M., Independent from the Mogollons convey the intelligence that a large and rich body of ore has been exposed in the third level, north, 300 feet from the surface, in the Deadwood mine. This is a very important strike and practically proves the existence of an ore shoot upwards of six hundred feet in length carrying values in gold and silver ranging from 12½ to 15½ per ton for the entire distance. The property is owned and operated by Cleaveland & Weatherhead, and for every single dollar they have expended in

development the ore reserves show upwards of three dollars. Conservative estimates place the amount practically blocked out and in sight at close to 300,000\$. The Deadwood is one of the great coming mines of the country, and the owners at the very inception of its development wisely determined first to ascertain whether they had a mine; secondly, having proven they had a first class property, the erection of a milling plant would engage their attention. The present year will determine the location of the mill and power plant, and at this writing it is almost an assured fact that by the first of next June the Deadwood mine will be turning out bullion at the rate of a quarter of a million dollars a year.

Eye Disease Among Children in Phenix.

Phenix is aroused and taking action to prevent the spread of a terrible eye disease in the city schools. The disease, which is known to be contagious, brought out the statement from Superintendent J. D. Loper that there are seventy well defined cases of trachoma in the city schools. Trachoma is supposed to have started at the Indian school, where it became so prevalent at one time as to attract the attention of the government. It has now spread all over the city, the children of white parents as well as Indian and Mexicans, being infected.—Phenix Gazette.

Suit Compromised.

Capt. Thos. Rynning, superintendent of the Territorial prison, who went to Yuma last week to be present at the trial of the suit against the Territory, brought by the city of Yuma, has returned home wearing a smile a yard long. The suit was compromised by the city of Yuma paying the Territory \$1,000 for the old machinery at the Yuma prison and consenting to removal of all other personal property. The compromise was a good thing for both parties to the contention as long and expensive litigation would have followed a failure to settle the matter outside of court.—Florence Blade.

Latest report from the Little Butte are still encouraging. At a depth of 200 feet the face of the shaft is all in ore and has been for the last fifteen feet. Mr. Sharp is driving steadily in all the drifts and all is in ore. A few days ago a round of shots were put off and about 14 tons of shipping ore was broken down. Of this there was an immense chunk of solid shipping ore that weighed close to two tons.—Wickenburg Miner.

A new flag floats from the school house. This is according to the law requiring the trustees to provide our national emblem.

It is a Wonder.

Chamberlain's Liniment is one of the most remarkable preparations yet produced for the relief of rheumatic pains, and for lame back, sprains and bruises. The quick relief from pain which it affords is alone worth many times its cost. Price 25 cents, large size 50 cents. For sale by H. H. Watkins.

Anyone desiring stenographic work done will please call up phone No. 3.

Good Force on the Inspiration.

About ninety men are now employed in development work on the property of the Inspiration Copper company. Supt. Mike Shovlin is in charge and the task of thoroughly exploring the ground proving an increased extent of the low grade ore body is being rapidly accomplished under his direction. On the 400 level of the Joe Bush shaft crosscutting north, south, east and west is going on. The north and south crosscuts are approximately sixty feet long. All these crosscuts are still in chalcocite running 3 per cent or better in copper.

The Scorpion shaft, which was first started about six weeks ago is now nearing the 140 foot point, at which it is expected that the copper carbonate encountered so far will give place to the Pinal schist carrying copper in quantities that will make the ore of commercial value. About a dozen men including miners, engineers and carpenters, are working at the Scorpion shaft. The two chert drills that have been in use on the Inspiration property for several months are still working. Fifteen holes have been put down so far and the results obtained in each instance have been very satisfactory. The Taylor, Columbia and Mercer tunnels are still being extended and work in the Bulldog shaft is progressing steadily. On the 275 foot level of the Bulldog, crosscuts are being run west and south.—Globe Silver Belt.

Schools Dismissed in Order to Harvest Fruit.

A Grand Junction Colo., dispatch says: To harvest a crop of fruit estimated to be worth 1,500,000\$, it was announced today that all public schools will be dismissed for two weeks beginning Monday.

The pupils in the Indian school and all public schools in the Grand valley also will be given a vacation that they may help relieve the shortage of pickers and packers. It is estimated that more than 10,000 men and women will be assisting in the harvesting, the crop of which is being shipped out at the rate of forty cars daily.

A sample of copper ore sent to Globe for assaying this week from the Hub mine, located about three miles north of the San Juan property in the Gila valley, ran 138½ to the ton, according to the stockholders of this mine. A party made a trip to their properties—the Hub and Aztec mines—last Sunday. They are now making preparations to continue development work there. It is probable that ore can be shipped from the start. The Hub property has a shaft about 200 feet deep.—Silver Belt.

The Gold Road Red Top Mining Co. is now offering a limited amount of working capital stock at 15 cents per share.

Croup Cured and a Child's Life Saved.

"It affords me great pleasure to add my testimony to that of the thousands who have been benefited by Chamberlain's Cough Remedy. My child, Andrew, when only three years old was taken with a severe attack of croup, and thanks to the prompt use of Chamberlain's Cough Remedy his life was saved and today he is a robust and healthy boy," says Mrs. A. Coy, Jr., of San Antonio, Texas. This remedy has been in use for many years. Thousands of mothers keep it at hand, and it has never been known to fail. For sale by H. H. Watkins.

ARTICLES OF INCORPORATION OF THE Arabian Gold Mines Company

KNOW ALL MEN BY THESE PRESENTS: That we, the undersigned, do hereby associate ourselves together for the purpose of forming a corporation under the laws of the Territory of Arizona, to that end do certify and declare as follows:

ARTICLE I.
The names of the incorporators are Robert Hannack, Anson H. Smith and Tom E. McClelland, all of the County of Mohave, in said Territory, and the name of the incorporation shall be the Arabian Gold Mines Company. The principal place of business of the corporation, in the Territory of Arizona, shall be at Kingman, in the County of Mohave, in said Territory, and the corporation may have such other offices, either within or without the Territory of Arizona, as may be established by the Board of Directors of the corporation, at which offices one or more of the Board of Directors may be held.

ARTICLE II.
The general nature of the business to be transacted by the corporation is as follows, to wit: To prospect for, locate and acquire by discovery, lease, license, option, purchase, franchise, grant, devise or otherwise, and to hold, possess, mine, enjoy, develop, drill, work, operate, exploit and explore mines, mineral lands and mining claims, mining rights and metalliferous lands, and to sell, lease, convey, mortgage, hypothecate, assign or otherwise dispose of the same; to construct, build, operate and maintain mills, smelters, reduction plants, water and power plants, refineries, manufacturing plants, assay offices and furnaces, crushing houses; to purchase, lease, treat, refine, extract, produce, crush, concentrate and smelt all kinds of ores, precious metals, minerals and metalliferous substances; to buy, sell, exchange and otherwise deal in the same; to construct, build, operate, lease, mortgage, hypothecate, assign, convey, lease, license, option, purchase, franchise, grant, devise or otherwise, and to hold, possess, mine, enjoy, develop, drill, work, operate, exploit and explore mines, mineral lands and mining claims, mining rights and metalliferous lands, and to sell, lease, convey, mortgage, hypothecate, assign or otherwise dispose of the same; to construct, build, operate and maintain mills, smelters, reduction plants, water and power plants, refineries, manufacturing plants, assay offices and furnaces, crushing houses; to purchase, lease, treat, refine, extract, produce, crush, concentrate and smelt all kinds of ores, precious metals, minerals and metalliferous substances; to buy, sell, exchange and otherwise deal in the same; to construct, build, operate, lease, mortgage, hypothecate, assign, convey, lease, license, option, purchase, franchise, grant, devise or otherwise, and to hold, possess, mine, enjoy, develop, drill, work, operate, exploit and explore mines, mineral lands and mining claims, mining rights and metalliferous lands, and to sell, lease, convey, mortgage, hypothecate, assign or otherwise dispose of the same; to construct, build, operate and maintain mills, smelters, reduction plants, water and power plants, refineries, manufacturing plants, assay offices and furnaces, crushing houses; to purchase, lease, treat, refine, extract, produce, crush, concentrate and smelt all kinds of ores, precious metals, minerals and metalliferous substances; to buy, sell, exchange and otherwise deal in the same; to construct, build, operate, lease, mortgage, hypothecate, assign, convey, lease, license, option, purchase, franchise, grant, devise or otherwise, and to hold, possess, mine, enjoy, develop, drill, work, operate, exploit and explore mines, mineral lands and mining claims, mining rights and metalliferous lands, and to sell, lease, convey, mortgage, hypothecate, assign or otherwise dispose of the same; to construct, build, operate and maintain mills, smelters, reduction plants, water and power plants, refineries, manufacturing plants, assay offices and furnaces, crushing houses; to purchase, lease, treat, refine, extract, produce, crush, concentrate and smelt all kinds of ores, precious metals, minerals and metalliferous substances; to buy, sell, exchange and otherwise deal in the same; to construct, build, operate, lease, mortgage, hypothecate, assign, convey, lease, license, option, purchase, franchise, grant, devise or otherwise, and to hold, possess, mine, enjoy, develop, drill, work, operate, exploit and explore mines, mineral lands and mining claims, mining rights and metalliferous lands, and to sell, lease, convey, mortgage, hypothecate, assign or otherwise dispose of the same; to construct, build, operate and maintain mills, smelters, reduction plants, water and power plants, refineries, manufacturing plants, assay offices and furnaces, crushing houses; to purchase, lease, treat, refine, extract, produce, crush, concentrate and smelt all kinds of ores, precious metals, minerals and metalliferous substances; to buy, sell, exchange and otherwise deal in the same; to construct, build, operate, lease, mortgage, hypothecate, assign, convey, lease, license, option, purchase, franchise, grant, devise or otherwise, and to hold, possess, mine, enjoy, develop, drill, work, operate, exploit and explore mines, mineral lands and mining claims, mining rights and metalliferous lands, and to sell, lease, convey, mortgage, hypothecate, assign or otherwise dispose of the same;
